U of M faculty to “celebrate aging” in 1666 Coffman
By Pam Field
Smiles abounded and the mood was jubilant December 2 when about 400 people at the Earle Brown Center listened to plans for 100 condominiums to be built for the University of Minnesota Retirees Housing Corporation this coming spring.

"I feel as though we should have a trumpet here, and a choir singing the 'Hallelujah Chorus," said Gertrude Estee- ros, president of the Housing Corporation.

The development, called 1666 Coffman, will be built on land leased from the university next to its golf course near Arpenteur and Cleveland Avenues in St. Paul. It is now becoming a reality after "talk of it 20 years ago. "A formal statement to begin planning was made in May of 1982," said Estero.

Still time to give to Block Nurse program

By June 8th, the Multnomah neighborhood in Portland, Oregon should have a Block Nurse serving its older residents. Ann Bremer, the primary block nurse, and Jane Spencer, who works with the Human Services Dept., came to St. Paul in December to meet with persons associated with the St. Anthony Park Block Nurse Program. We got the idea from reading about the program in a national nursing magazine," Bremer said. "I think it really makes sense for our neighborhood and I'm excited about having the chance to try it!"

The Portland Project has received funding for two years from the Northwest Area Foundation. Bremer and Spencer were particularly interested in the details of the neighborhood fund drive that was launched December 6 in District 12. The St. Anthony Park program hopes to raise at least one month's subsidy, $2500, through the drive.

There is still time for District 12 residents to give a holiday gift to the Block Nurse program to help their neighbors in St. Anthony Park receive in-home care.

Letters were mailed to all residences in District 12 in early December asking for the holiday gift. Anyone who really wants to help should receive a letter and who would like to make a tax-deductible gift to the Block Nurse program can do so by returning the coupon below with a check made out to District 12/Block Nurse.

Special thanks to those who helped stuff, stuff and seal the 2416 letters that were mailed: Alva Venubates, Chris and Jean Donaldson, Jo Anne Rohricht, Linda Smith, Julie Himmelrath, Sandy Berglund, and Harlan and Ann Copeland.

College Zoning Task Force to meet

Zoning Code issues of parking, institutional boundaries, and off-campus student housing relating to colleges and universities in St. Paul will be reviewed during the next six months by a special College Zoning Task Force.

The St. Paul Planning Commission will appoint members to the task force from district councils or colleges with universities within their boundaries, representatives from those institutions, and members of the Planning Commission. A Planning Commission member will chair the group.

Planning continues for Centennial Celebration

Planning will continue for the two-year celebration of St. Anthony Park's Centennial with a meeting January 29 at 7 p.m. in the common room of the St. Anthony Park Library.

"Our purpose here is to start the momentum," Chairman David Lisef told the Coordinating Committee at its first meeting on November 27. "We hope that a number of the groups you represent will want to plant events or projects that not only highlight our history but plan for a future in this community."

"We see the Centennial as a vehicle to get people moving in ways they may not have thought of before," he continued. "History can be a moving force for community change and involvement."

Archaeology, history, genealogy classes, pictorial retrospective of the Fourth of July Kiddie Parade, designating a Heritage Preservation area, a contest for ideas and/or plans for St. Anthony Park of the future were ideas that surfaced during the brainstorming session.

Letters of invitation were sent to 43 organizations and individuals for the first meeting of the Coordinating Committee. "I was afraid we would miss some and we specifically the task force will address on-campus parking requirements, policies regarding establishment and expansion of institutional boundaries, and regulations affecting off-campus student housing. Study of these issues has been recommended by a number of district councils and task forces over the past several years, according to David Lane. Planning Commission Chair Lane said that the task force will address the issues in two phases, Lane said. "The first phase will cover parking requirements and institutional boundaries. The second will deal with student housing issues."

District 12 will be sending a representative to the task force which will begin meeting in the Jay House, call 46-8984, with concerns on any of the issues to be addressed should write or call the District 12 office, 646-8984, so that concerns can be incorporated into the task force discussion.

Delegate nominees needed

Work is beginning on delegate slates for the District 12 Council election even though the actual voting will not be done until April. Nominating committees to oversee recruitment of delegates for the slates are being formed in North and South St. Anthony Park.

Two delegates will be elected to two-year terms in each of the two areas and two alternates will be elected to one-year terms. Alternates attend committee and council meetings and participate in all discussions. They move up to delegate status when one of the elected delegates has to resign. An alternate may also vote in meetings if any of the delegates is absent. Residents of either North or South St. Anthony who would be interested in running for a seat on the Council should contact one of the current members of the delegation or call the District 12 Office. Business owners in the West Midway area who would be interested in filling a delegate slot on the business delegation can contact the Midway Civic and Commerce Association or the District 12 Office.

Members of the Council are expected to participate in either the Physical Planning or Human Services Committee meetings as well as attend the monthly meetings of the full Council. Members also participate from time to time in citywide committees and task forces.

Victory House needs your donations

Victory House, 2300 Wycliffe St., has a great need for blankets, pillowcases and warm winter clothing for men. They would also appreciate books, magazines and jigsaw puzzles.

Anyone with items they are willing to donate can drop them off at the house or at the District 12 Office, 2380 Hampden Ave. If you have one or two boxes of materials to donate but no way to get them there, call 46-0594, and they will try to pick them up.

Victory House is a board and care home for recovering alcoholics. It is located on the edge of the West Midway industrial area in District 12.

Jo Anne Rohricht, District 12 representative, accepts the Agency Achievement Award from the Midwest Alliance in Nursing, Pat Schroeder (left), chairperson of MAIN, presented the award in recognition of the collaborative efforts of the Council, Ramsey County Public Health Nursing, and the University of Minnesota School of Nursing, in developing the St. Anthony Park Block Nurse program.

Yes, I want to give a gift to the Block Nurse program.

Beware of ‘free’ energy audits

Beware of the telephone call or person at the door offering a "free" energy audit. Both methods are being used in the Twin Cities to gain access to houses. In some cases businesses simply want to sell weatherization services or products. However, this method is also being used to enter houses for criminal purposes. If someone comes to your door offering an NSF or neighborhood energy audit, do not let them in, District 12 or NSF Energy Auditors will not just appear at your door. They come only after a request from you, and they call to make an appointment before coming.

Is your home computer insured?

If there is a home computer in your family stock this year, you may need to use it to check on how adequate your insurance coverage is on it. Most homeowners' insurance policies have a flat amount that covers damage or loss of personal property. As long as the value of your belongings is close to or under the amount, your computer would be covered just as furniture and appliances are. It is probably not protected from damage from a power surge unless the surge should cause a fire. Home computer owners may want to invest in a surge arrestor.

Software or disks may not be covered as completely as the computer. Some insurance companies offer coverage only under a special "floater" on a standard policy. In addition, it can be difficult to determine value of software loss or damage. Some programs contain information that are not replaceable by money. Backup copies of such programs should be stored in a safe deposit box or other safe spot.

Sharpen those blades

Laugford Park will be host to speed skating races on Thursdays, evenings, Jan. 3. The races are intended for beginning speed skaters, ages 4 through 14. So long-blade racing skates are not required. Ribbons will be awarded to the first five finishers in each group, and participation ribbons will be given to all others who compete.

The races will begin at 7 p.m. It is suggested to register in advance or arrive at Laugford Park no later than 6:30 p.m. The races are sponsored by St. Paul Parks and Recreation, Eastern Minnesota Skating Association and Twin Cities Nursery.

More winter fun

Don't forget about Winter Sports Day at Laugford Park, February 2-3. As usual, there will be lots of skating, races, finishing stations, cross-country skiing and food! New this year, according to Comer, Tresed, will be a raffle and a medalion hunt for children in the sixth grade and younger.

More details and a complete schedule will be featured in next month's Bugle.

Heritage preservation

Three area sites have been designated by the St. Paul Heritage Preservation Commission as Heritage Preservation Sites. The St. Anthony Park Library, Northern Pacific Railway Company's Como Shops inEnergy Park, and the Salvation Army Women's Home, 1474 Como Ave.

According to Tom Zahn of the city planning office, the designation is "a local recognition of the building's contribution to the history of St. Paul."

The designation also sets up safeguards against any exterior building changes which are not consistent with the historical architectural style of the building. The three sites are already on the National Register of Historic Sites.

Magnet schools

In order to achieve voluntary desegregation, the St. Paul School Board in December passed plans for at least four new magnet elementary schools in 1985, and four more in 1986. The magnet schools will each have a "specialty"; for instance, the Manfield Galister Elementary will have a theme of World Technology, while Prose Elementary will be a School of the Future.

The goal is to lure students into specific areas to achieve desegregation by allowing any elementary student to attend any magnet school.

While this will achieve desegregation is not yet known. School Superintendent David Hettner doesn't expect many transfers during 1985-86 school year, and then mostly at the kindergarten level.

And the effect on other city elementary schools is not yet known. Todd Lefko, a St. Anthony Park resident who is president of Citizens for Excellence in Education (CEE), warned the school board about possible draining other city elementary's of talent by creating such magnet schools.

It's also not known how the size of existing elementary schools will be affected.

Magna
tes in the Park

The highly regarded Music in the Park series returns to the St. Anthony Park United Church of Christ Jan. 20 with performances by mezzo soprano Janis Hardy, tenor Vern Sutton and pianist Philip Brunelle.

The trio should be familiar to Minnesota audiences. Hardy has been featured with the Minnesota Opera Company while Sutton and Brunelle are frequent guests on Garrison Keillor's "A Prairie Home Companion."

The trio will perform solos and duets with Aaron Copland, Charles Ives and Jerome Kern (born 100 years ago). They will also be premiering "Whales Weep Not!" by Marjorie Rusche.

The piece, based on a D.H. Lawrence poem, was written for Hardy—as Rusche's words, "To Janis, the warm-hearted", and was commissioned by the Schubert Club. Rusche had several of her compositions performed in the area; she holds a degree from the University of Minnesota in music theory/composition and is a charter member of the Minnesota Composers Forum. Her opera, Dance of Death, will be premiered February 2, and 3 by the Skylight Civic Opera Theater in Milwaukee.

Hardy, besides her operatic work, has performed extensively with the St. Paul Chamber Orchestra and in the Plymouth Music Series, organized by Brunelle. A native of Minnesota, Hardy now resides in New York City.

Sutton, like Hardy a veteran of the Plymouth Music Series, is a professor in the University of Minnesota's School of Music and has directed more than 20 productions for the University Opera Workshop.

Brunelle, in addition to his activities with the Plymouth Music Series, is principal conductor of the Minnesota Opera and music advisor for Walker Art Center. He and Hardy released a digital recording last fall, Old American Songs, a collection of Aaron Copland songs.

Tickets for the concert, which begins at 2 p.m., are available at Micawber's and The Bibelot, or at the door the day of the concert. Single admission is $8 for adults and $5 for seniors and students.

The series is sponsored by the St. Anthony Arts Forum, with a grant from the Minnesota State Arts Board.

Energy Park news

There will be an international flavor in Energy Park when a Danish electronics manufacturer sets up shop in 1985. Purup Electronics of Lystrup, Denmark, is constructing a 25,000 sq. ft. facility to hold the firm's North American headquarters and assembly plant. Purup manufactures a unique plate-making machine for the printing industry, utilizing laser graphics to produce plate-ready film from original copy in one working process.

The Energy Park facility, which is directly across Energy Park Drive from Bandana Square, was financed by a $18 million St. Paul Port Authority industrial revenue bond issue.

Dealing with Russia’s “defense psychosis”

By Dimitris Tselos

The number and danger of nuclear weapons so pitifully summarized by Florence Chambers in the Bugle did not raise the crucial questions of why and how did Russia become our “enemy” and how could or would the Soviets or the United States attack one another.

The fear of Russia was aroused by its collective defense psychosis. This was caused by its having been invaded over many years by Mongolia, Napoleon, the United States, our Allies and Hitler, which led to more than 20 million dead Russians. That psychosis was manifested in the creation of buffer states around her borders by political and military infiltration, in the shooting down of our reconnaissance plane during the Eisenhower period, and the Korean aircrash which suspiciously drifted 300 miles into Russian strategic territory. Despite the fact that border defenses are meaningless in our nuclear era, it is unlikely that the buffer states will be freed soon.

The other fear of Russia grew from the willful or ignorant interpretation by John Kennedy of Krushchev’s causal pleading for “We will bury you,” as meaning that the Russians will conquer us and bury us alive. To Russians, Greeks and other Europeans such a remark merely meant that Russian socialism would outlive American Capitalism or be at its feral. Consequently, echoes of Kennedy’s interpretation have survived in speeches and the media and permeate the fear and suspicion of Russia.

Thanks again; please keep it up

Readers continue their generous support of the Bugle during its annual fund drive. Contributions as of Dec. 12 totalled $4195.

However, if the Bugle is to meet its 1984 goal of $8000, your help is still needed. Because of increasing production costs, the Bugle needs your help more than ever. Please send your tax-deductible contributions to ensure a solid start in 1985 for the Bugle. It’s easy to do—just fill out the form below and mail to: The Bugle, 2380 Hampden Avenue, St. Paul, Minnesota 55114.

The following individuals and businesses contributed since the last issue of the Bugle:

Eleanor Anderson

Creative senior housing

Two groups in the area are in the process of providing for the housing needs of seniors interested in staying in the area or in moving here. Luther Place Housing Corporation is well into construction of a 19-unit condo-minium project in St. Anthony Park. Coffman Housing Partners has just announced its plans for a 100-unit complex in Falcon Heights.

Think: 200-CD people over the age of 55 will now have safe, comfortable, no-maintenance housing conveniently located, for many, in the area in which they have lived and worked for years. They’ll enjoy the ambience of the Park community; they’ll have the advantages of living near others at the same time as they maintain their independence through self-sufficiency and privacy.

The housing projects will be a blessing for the community as well as for the residents: A resource of life experience, historical knowledge and academic knowledge will be gathered in the two housing units. The opportunities for challenging and helpful interaction with younger community residents and with community groups are immense.

The two initiating groups are to be commended for matching the needs of seniors with the unique possibilities offered by this community. We all stand to benefit from their efforts.

But there is still a large group with similar needs who remain, so far, unnoticed. If not unnoticed, at least these two groups, over 20, have been met. These are the seniors who would like to remain in the community, or move to a comfortable, convenient location such as this but who can’t afford to purchase condominiums. Some own homes, but of such modest size as to preclude purchase of a new condominium. Some have been renting in the area, having retired here upon retirement from jobs which never provided the level of salary enjoyed by many who lived and worked here.

These seniors experience the same needs for release from the worry and work of house maintenance. They, too, would appreciate the opportunity to experience the joys of semi-congregated living. They, too, need the convenience for shopping, medical needs and transportation which the Park offers. They, too, have important contributions to make to life in the community.

Where could they live? Who will consider their needs? The Fuller Labs building seems an ideal location for rental units. There’s plenty of parking, the bus runs by the door; there’s a library, medical and business offices, restaurants and shops just across the street.

Potential buyers of that property are most likely looking at some sort of business development on the site. Might they be challenged to consider whether or not the community needs more offices or more stores? Might they consider the need for developing a housing unit which enhances life in the community by retaining its residential character and providing options for more seniors to continue to live among us as long as possible?

The need for a creative attempt by any group to speak to that need would be applauded by many.

Mary Mergenthaler
January, 1985

So Washington has been trying to surpass Soviet nuclear power, whether real or implied, fully knowing that the Russians would not or could not use theirs. Why not? Several reasons: simply, such an attack would invite NATO and USA retaliation; more importantly, even an unopposed Russian attack would destroy the Canadian and American fields from which they get their multimillion tons of grains for desperately needed food for their people; and such an attack would also kill all the potential candidates for the socialist faith. Likewise, a nuclear attack on Russia by the United States would irradiate many European countries and kill millions of prospective candidates for the democratic faith.

The core of the problem is as simple as shown above. But our presidents have made the United States the world’s policeman and themselves the great defenders of our nation and singular liberators of Central and South American countries from Marxist temptations, while ignoring the existence of dictators and death squads. At the same time the trillion-dollar weapons for air, land and sea wepons will continue to increase in order to provide “defense” against a mythical or impotent enemy, while unemployment, hunger, disease, environmental and educational needs of our nation and the world will at large continue to decay desperately for attention.

Escape from 1984

I went to a movie with my son the other day. And right off the bat, the hero, one Buckaroo Banzai, takes off in his rocket car and heads straight toward a solid rock mountain to blow the top off. Now, my son and I are no fools. We knew that Buckaroo wasn’t going to crash into that mountain and blow it up in a ball of fire, not right in the beginning of a movie that has his name on it. But even though we were sure that Buckaroo would escape triumphant and unburned, we were still pretty tense as the moment of truth approached.

Well, as it turned out, Buckaroo traveled right through that mountain without putting a single stone out of place. And Buckaroo himself looked none the worse for wear. But, in fact, he was changed forever, because, while he was inside that mountain, he entered the Eighth Dimension.

For as long as I can remember we have all been speeding toward our own solid rock mountain, the coldly ominous ‘1984’. And even though we have more or less known that we would get through it all right, it got pretty tense as it loomed in front of us bigger than life just a year ago.

Now we five ourselves coming out the other side – and except for a normal year’s aging it probably doesn’t appear that we’ve changed much. But is it possible that we, like Buckaroo Banzai, have all been profoundly changed forever by our passage through ‘1984’?

I can remember the feeling I had last New Year’s Eve, when I tasted cautiously into the first minutes of the year, as if I were casting myself into the seat of that rocket car. I had an awesome sense of the power that for the moment only humbled quietly just beneath the surface, and I just knew that this ‘1984’
could do some amazing things if it wanted to.

But nothing happened. Not right away. So I waited. I stayed pretty alert all during January. And February and March still had a kind of special feeling about them. But long about July I began to get a little suspicious. And by September I was convinced that we had nothing but an ordinary year on our hands, that the only thing that made ‘1984’ different from any other year was some flashy advertising.

So we’ve all been sitting in the seat of this over-hyped rocket car for twelve whole months, and it never did take off like everyone expected it to. And now it’s time to climb back out again.

But wait a minute. Look around. Somehow just by sitting there; we got all the way through that solid rock mountain! ‘1984’ is behind us and we didn’t feel a thing! So, are we changed? Did we enter the Eighth Dimension?

In the beginning of the year, all we wanted to believe that ‘1984’ was somehow going to be different. We wanted to believe that the predictions written years ago in a book could actually come true. And we bought that book by the hundreds of thousands, because you can’t tell the predictions without a program. We wanted to be sure that we would recognize them when they happened. But they didn’t happen. And whether we feared or welcomed that particular depiction of the future, we couldn’t help being a little disappointed. This year has been pretty much like any other year, despite what the advertising claimed. We’ve all changed in the same way that children change when they figure out who the tooth fairy really is. We still yawn to believe in magic.

So now we leave behind us one of the sinister symbols of our time. The year that was going to change the world and all of us with it is over. And as far as the eye can see there is nothing standing in our way as we march on into the future.

But what’s that dark speed on the horizon? It looks like…yes, there it is; just like magic! ‘2001’.

Warren Hanson

A few eternal truths
By Pam Field

When it's all said and done—this is a philosophical time of the year.

Nearly everyone I talk to mentions "New Year's resolutions." I decided to start early this year. I've given up coffee and my heart is pounding from the caffeine withdrawal. But it's OK, and I'm glad because "I'm doing something good for myself." But sometimes I need to get away from analyzing and just work on accepting.

I tried and tried to think of what I could expose on this column and decided to pass on an eustological laundry list of eternal truths. (From Gurus, Meta-

Letters
Stop tobacco sales
Stopping the sale of tobacco by the Falcon Heights Pharmacy invites congratulations and hopes that other pharmacies and stores will do the same. The addictive nature of tobacco and its relatively low cost make it an irresistible temptation to both users and non-users. Their reduction and eventual extinction would be a blessing to humanity.

Dimitris Tselos, Historian of art and political scientist.

Illustration by Warren Hanson

6. There is no way of getting all you want.
8. You can't have anything unless you let go of it.
You only get to keep what you give away.
9. There is no reason particular why you lose out on some things.
10. The world is not necessarily just. Being good often does not pay off and there is no compensation for misfortune.
11. You have a responsibility to do your best nonetheless.
12. It is a random universe to which we bring meaning.
13. You don't really control anything.
14. You can't make anyone love you.
15. No one is any stronger or weaker than anyone else.
16. Everyone is in his own way vulnerable.
17. There are no great men.
18. If you have a hero, look again; you have diminished yourself in some way.
19. Everyone lies, cheats, pretends (yes, you too, and most certainly I myself).

20. All evil is potential vitality in need of transformation.
21. All of you is worth something, if you will only own it.

22. Progress is an illusion.
23. Evil can be displaced but never eradicated, as all solutions break down.
24. Yet it is necessary to keep on struggling toward solutions.
25. Childhood is a nightmare.
26. But it is so very hard to be an on-your-own, take-care-of-yourself-cause-there-is-no-one-else-to-do-it-for-you-grown-up.
27. Each of us is ultimately alone.
28. The most important things each man must do for himself.
29. Love is not enough, but it sure helps.
30. We have only ourselves, and one another. That may not be much, but that's all there is.
31. How strange that so often it all seems worth it.
32. We must live within the ambiguity of partial freedom, partial power and partial knowledge.
33. All important decisions must be made on the basis of insufficient data.
34. Yet we are responsible for everything we do.
35. No excuses will be accepted.
36. You can run, but you can't hide.
37. It is most important to run out of scopepat.
38. We must learn the power of living with our helplessness.
39. The only victory lies in surrender to oneself.
40. All of the significant battles are waged within the self.
41. You are free to do whatever you like. You need only face the consequences.
42. We don't know what we do, and maybe anyway.
43. Learn to forgive yourself, again and again and again.
44. I'm dying for a cup of coffee.

Merry Christmas.

Seminar shows it's never too late
By Karis Graham

Sitting in a small dorm room with her Greek alphabet taped on the walls, 57-year-old Betty Lou Hadley described and contemplated the new life she is experiencing as a junior seminarian at Luther Northwestern Seminary.

Hadley, from Lyman, Nebraska, is seeking her Master of Divinity degree and is finally getting to live out a dream.

"This has probably been the longest call in history," she said. "I have wanted to become a pastor since I was twelve but then I started doing a woman then."

Raised a Baptist, Hadley said she was never anything more than a lay person in a church was impossible.

"I decided just to be a medical missionary where I was young because that was as involved as I could become," she said.

In the 1940s Hadley earned her degree in biochemistry from Pacific Lutheran. Her goal was still to be a medical missionary, but her life took some turns along the way.

"I met this man who was studying to become a Lutheran minister," she said. "I introduced me to the Lutheran Church and it was then that I started to grow."

"I loved the liturgy, the doctrine… I felt complete."

Her life changed even more in the following years when she was confirmed as a Lutheran in college. She also married that Lutheran man, Clarence Hadley, who became a pastor.

had six children.

"His career always took precedence, and I carried on with the motherly duties," Hadley said. "I also became very active in the lay ministry program in the church at that time."

Meanwhile, her husband changed careers and became a physician.

And a year ago, when all of her children were grown, Hadley returned to school in pursuit of a second degree in philosophy. But while attending Midland College in Nebraska, enrolling in Luther Seminary stuck in her mind.

"In July of 1984 I went down to register for fall quarter but I decided that would be a waste of my money. So I jumped in my car and headed home," she said.

"Right when I got there, I called the seminary and asked them to send me information. I knew (that attending the seminary is what I wanted to do)," Hadley decided to tell her children before her husband.

"They could help soften the blow a little better," she said.

But she did tell him after she was accepted, and he has been very supportive. "This is a real opportunity for me finally to be what I've always been meant to be," she said.

"Late bloomers" seem to run in the Hadley family, she said.

Her mother, who is now deceased, did not learn how to drive until she was 60. Hadley says she has a lot of her mother's spirit in her.

According to Hadley, every one has been very supportive in her decision to attend the seminary.

"I'm very much a part of the Lutheran Northwestern Seminary."

By John Coffey

Rep. John Rose (65A) has changed his stature in the Minnesota House considerably, first as a chairman of the Environment and Natural Resources Committee, second as a member of the House's majority party.

He also has served on the committee for all eight of his years in the House, replaced William Manger of Duluth both as its chairman. He does not see any immediate changes as chairman.

"Certain issues remain important regardless of who was here," he said. He pointed out water contamination from landfill as one of the top issues to confront him.

Rose feels industrial waste is an immediate threat.

He singled out the city of St. Anthony as one place where contamination is threatening the water supply. "What's happening in St. Anthony is really important," he said. He also cited the government arsenal in Arden Hills as a possible source of contamination, though he said "The first thing that has to happen (before contamination can be found) is the source has to be clearly identified."

Rose also sees the Superfund, used to clean up toxic dumps, as a source of great interest to his committee, although he said the committee should discuss each potential use of Superfund money carefully. About the possibility of using this money in the 1985 session Rose said, "We will just have to wait and see what transpires."

More important than his committee appointment, Rose said, is the fact that the Republican Party now controls the House.

Identification is a major goal of the Republican Party, but Rose said, "I am not the one who is going to change the name of the party."

John Rose.

Minnesota House. By winning 22 new seats to the Democrats' seven, the Republicans gained a 70-64 advantage. Rose said it will be much easier to exert force in the decision-making process, since for the first time he will be voting with the majority party. He did not speak of any particular legislation he wants to emphasize, saying it is early in the term and a great deal remains to be seen.

Rose said his familiarity with environmental issues has been vital to his standing in the House. He said of his recent campaign against George Mark, "In the race I ran the environmental issue was a very important issue." Rose had set up a House committee on locating nuclear waste repositories and the state's work on the Environment and Natural Resources Committee.

Light Rail Transit in the Twin Cities

George Isacs, P.E., active in transit matters for almost 20 years in the Twin Cities, will make a slide presentation Feb. 12 on light rail transit: what it is, what it is not, and how it can be deployed in the Twin Cities. Any development in light rail transit in the cities will naturally affect neighborhood transportation. Mr. Isacs has a personal commitment to this issue and has made presentations to various groups regarding transit issues since 1975. He has traveled extensively throughout the world to study light rail transit in various environments and will make use of a slide collection acquired during his travels. Currently, Mr. Isacs is the Ramsey County representative on the University Avenue group for the Transit Alternative Analysis Study by the Metropolitan Council. The group is studying alternatives for the University Avenue and the S.W. Hennepin County corridors. He is a registered electrical engineer and worked for Oxon Corporation for 25 years. This should prove to be an interesting talk for all of us.

JANUARY BOARD MEETING

There will NOT be a January board meeting.

MANY THANKS

To all the elves who made the Holiday Dinner a success:

Kiki and Warren Gore
Tom Sculcan
Joann and David Chein
Jane Dietl and Jim Lynsky
Jim and Sandy Christensen
Kathy Wellington

A special thanks goes to Steve Wellington, who organized all these elves. The clean-up committee is also well appreciate by their low glamorous, but vital contributions. Also, we thank the Muffuletta for assistance with chicken procurement.

DINNER MEETING

The monthly dinner meeting will be held on Tues., Feb. 12, at 5:45 p.m., at the United Church of Christ. Members will be called for dinner reservations. Any cancellations or additions can be made by calling Bob Beck at 644-2816 before 6 p.m. on Sun., Feb. 10. Members who do not cancel reservations and do not attend the dinner will be billed. Dinners are $4.25.
Discourse from 1

selves. If a question arose, there was no one available to help.

The Discourse System allows the teacher to send a question from his terminal to all of the
student terminals. The students are asked to respond, and their responses are sent back to the
leader. The teacher views responses simultaneously and answers questions or solves
problems as soon as they arise.

"This system allows teachers to monitor each student's
response," Robinson said. "It gives the teacher an ideal
chance to practice one-on-one tutoring—an important part
of teaching learning-disabled children.

"As groups get larger, commu-
nication becomes more dif-
cult," Robinson said. "This sys-
tem puts each teacher more in
touch with individual needs in
terms of learning."

Robinson said that the sys-
tem has been in use since Sep-
tember and is the only one of
its kind in the world used to
teach students.

Charlotte Kelly, a Level IV
teacher at St. Anthony Elemen-
tary, works with learning-dis-
abled children at least three
hours each day. She is one of
22 teachers and specialists at
the school who have been
trained to use the Discourse
System.

Kelly explained that learning
disabled children can be
defined as those who are of
average or above average intel-
lence who are not reaching
their potential. In other words,
her said, there is a 60 percent
difference in where they are
and where they should be in
their learning levels.

"Most of what I've done is in
the social modes (i.e. express-
ing feelings and dealing with
self-esteem) and I've just been
delighted with the results," Kelly
said.

"Kids that have a hard time
putting things on paper find it
casier to use Discourse," Kelly
said. "They caught on to key-
boarding really fast, and so far
each student has used the sys-
tem over 20 hours."

Another benefit Kelly has
found is that if a student begins
working on a project incor-
rectly, the problem is moni-
tored by her immediately and
corrected. This creates an ef-
cient learning environment.

"I can control when the stu-
dents are going to respond,
which helps with those who try
to second-guess with their
responses and are usually
wrong," Kelly said.

"They (the students) enjoy it
and aren't afraid of it," Kelly
said. "Everyone picked it up,
and it's really wonderful."}

Robinson added that the
enthusiasm and cooperation of
the teachers also help make the
system work.

3M will continue to fund the
project for one year, but approv-
al is being sought for funding
through September, 1986.

Happy New Year
Coffman: ‘balance and harmony’

By Pam Field

"Scholarly life has taught us the value of independence, and the benefits of an academic community. 1666 Coffman will provide the best of both worlds: balance and harmony in both design and living environment," says a brochure about the housing project. It continues: "Inspired by the work of Renaissance architect Andrea Palladio, Milo Thompson, architect with Bentz, Thompson and Bierwirth, incorporated, created 1666 Coffman."

If plans go uninterrupted, groundbreaking will begin in February or March in 1985 and estimated completion in early 1986, said John Briscoe, developer and member of Coffman Housing Partners.

Standard features will include designer baths with oak vanities and antique brass accessories. There will be a choice of three kitchen plans. There is a free interior design consultation to aid in coordinating decorating the interior. Indoor garage parking with controlled entry is included with each home. There is elevator service to garage and upper levels. (The units will be no more than three stories, in accordance with a Falcon Heights housing code.)

Common amenities include: outdoor garden terrace, scheduled bus service adjacent to residence from both University of Minnesota and MTC and a multi-purpose/party room.

Design options include: heat circulating fireplaces, six feet high custom oak bookshelves and oak parquet flooring. Some apartments include patios extending a living room into a bedroom to create a den, designing for particular health requirements and adding closets or storage.

The Housing Corporation has not made a decision yet about having pets, said Gertrude Farrenz. "We said that the units are required to be owner-occupied."

Coffman from 1

 zona, New York and Greece waiting to live in the units. "This is why the lottery system is so important. People who are interested and who may not be here for a very valid reason have a fair chance," said Estes. She, along with other members of the Housing Corporation, anticipates moving into the project. Estes has a conservatory garden in the entrance of the home she lives in now. She said she will transfer her hobby of gardening with her. "I can entertain there. My goodness. everything I do here I can do there," she said.

Staff Sgt. John Kolmell of St. Anthony Park was presented with the Army Achievement Medal by Maj. Gen. James G. Sieben in a recent ceremony. Kolmell was cited for his exceptionally meritorious service to the Minnesota Army National Guard while serving as the rifle team captain and supply sergeant of the marksman ship account.

The Army Achievement Medal was given to Kolmell for his achievements during the period Sept. 1, 1982 to Aug. 4, 1984. He coordinated the rifle team’s participation in the Fifth

Dick Tressel.

Army Area Matches, including its transportation, team security and weapons, and managed more than 200 hand receipts for the marksman ship account, providing exceptional account- ability records.

Leonard Harkness, Falcon Heights, recently awarded the distinguished "American Spirit Award" by the U.S. Air Force. The award presentation took place at the 1984 National Association of Extention 4-H Agents annual meeting in Chi cago. The Air Force recognizes one association member annually.

Harkness was recognized for his outstanding contributions and achievements in exemplifying the "American Spirit" through his professional and personal life. He served as the state director of the 4-H program from 1949-1981.

Dick Tressel, St. Anthony Park, men’s athletic director and head football coach at Hamline University, has been selected Minnesota Intercollegiate Athletic Conference (MAC) football coach of the year by his fellow coaches. Tressel guided his Pipers to their first MAC football championship since 1966. His team compiled a 8-1-0 record in conference play and was 9-0-1 overall. The Pipers wound up the season ranked 10th in the NCAA Division III, and at one time during the season were ranked fifth.

Tressel has been at Hamline since 1978, and he has compiled a record of 39-27-2, with only one season below .500 percent.

Larson named new Community Ed director

By Ann Bulger

The new head of Community Education in St. Anthony Park is Dave Larson, a robust, gregarious man who enjoys his office looking out on Longford Park. Larson replaces Bernie Lancette, who is now at Battle Creek and Highland Hills schools.

Larson’s responsibilities include Community Ed at St. Anthony Park Elementary, Murray Junior High, and Longfellow Elementary schools. For the present, he plans to lease programs as they are, but is looking for new ideas. He is interested in projects such as field trips for senior citizens.

Larson comes to the community from Washington Junior High where he spent seven years in a similar position. Prior to that, he worked for City Services in St. Paul, after teaching in the service in Kansas. He spends every weekend in the Army Reserve, traveling to Texas and other states.

Having a strong interest in athletics, Larson referees football, baseball, hockey, and basketball for the city playgrounds and high school leagues. He coaches playground teams and belongs to twelve organizations. He has worked on the Winter Carnival for years as a chairman for sports events and as a former prime minister. This year, he is working closely with the king of the Carnival.

Dave has an abundance of energy, which is needed for the long hours he puts in. He “hasn’t had time to get married yet,” but thinks he might someday. He is familiar with St. Anthony Park, since he has a sister and several friends in the area.

Neighbors from 9

Ceremonies were held for Girl Scout Troop 502 last month. Missy Cutler was presented with the Silver Leadership Award and earned two volunteer service bars. Heather Sheldon, Kris Hogenson, Tanya Brandt, Gail Brinkmeyer, Sara Campbell and Andrea Fuhrman joined Barbara Fuhrman as Cadets. Mollie Hoben, former managing editor of the Bugle, was featured on WCCO-TV News in December as publisher and editor of the Minnesota Women’s Press, a Twin Cities biweekly newspaper slated for publication in early 1985.

Dr. John Kersey and Norma Ramsay of the University of Minnesota were featured in the December issue of National Geographic. The article detailed their achievements in treating leukemia through biotechnology.

Steve Wellington of St. Anthony Park, the city of St. Paul’s top financial planner, will go into private business in 1985. He will set up a private development company that will specialize in small to medium-sized projects.

Martha Hotchkiss, daughter of Dick and Alice Hotchkiss of St. Anthony Park, finished the season in the top 14, out of 50, in the women’s cross country team at LaCrosse University. Martha then competed in the NAIA national meet at Milwaukee, where the team finished 12th.

Quick.

NAME 10 FRIENDS WHO HAVE $2,000 TO PUT INTO AN IRA.

Couldn’t do it, could you?

Taxes. Car Payments. Mortgage. Keeping up with today makes it hard to even think about tomorrow. Much less scrape together $2,000 for a retirement fund. That’s why we offer the Affordable IRA.

Here’s how it works. Tell us how much you can afford to put aside for your retirement. $5.00 a day? $100 a month? Whatever the amount, we’ll arrange automatic monthly deposits into your own Individual Retirement Account where they’ll earn high money market rates. The funds are tax-deductible and the interest is tax-deferred until withdrawal.

A high return, good tax shelter and a nest egg for your retirement years, all at your own steady pace. Talk to us about the Affordable IRA. You really can’t afford not to.

Speaking Briefly

Language classes.
Two sets of language programs
will begin in January and February
at the International Institute
of Minnesota, 1694 Como Ave.
Registration for the spring semester language classes will be accepted through Jan. 17 or until classes are filled. For more information or registration materials, call 647-0191.

More Christmas
International Language Services, Inc. announces "Christmas Around the World," a 2-day mini-camp for children ages 6-12. The camp will be offered in the United Church of Christ at St. Anthony Park on Thursday and Friday, Jan. 3-4. This mini-camp will expose children to the language, culture, and traditions of six different countries from around the world. Children will "visit" three new countries each day. All instructors will be native speakers from their given country. The countries to be featured are: France, Greece, Germany/Switzerland, Italy, Latin America and Russia/Poland. Camp times are 9:30-3:30 each day. Call International Language Services, Inc. for a brochure.

Woman voters
Unit 8 of the St. Paul League of
Women Voters will be discussing bandana deregulation and the federal budget study on Monday, Jan. 21, at the Marla Krona residence, 1064 Mary Lane. The discussion will begin at 7:30 p.m. For more information contact Judy Probst at 644-0492.

Parlez-vous
Francaise
The ten-week winter term of French classes sponsored by the Alliance Francaise will begin January 7. Classes are available in the day and evening hours for all levels of French. Beginning, intermediate and advanced. There are also classes for pre-school elementary and junior high students. Classes are small and the conversational method is stressed. The specialty courses include: France d’Aujourd’hui (advanced conversation), Business French (international trade and study of the commercial vocabulary) and French for Travelers.

School News
By Ann Bulger and Robin Nehring

Como
Dr. Sue Walen, special education teacher at Como Park Senior High, will leave for Kenya after the holidays. Walen has received a Fulbright grant to be an exchange teacher in Kenya from January until June. Fourteen social studies students at Como are boning up on their homework on the federal government in preparation for their trip to Washington, D.C., from February 24 to March 2. Teacher Brian Lawler will accompany the group on this project, known as Close-Up. The students will visit the U.S. Congress, meet with their senators and representatives, and attend seminars with students from across the country.

The Parent-Teacher Organization at Como will meet on Monday, January 14, at 7:30 p.m. in the school library. All parents are invited.

Murray
Murray Magnet Junior High will hold its annual Winter Exposition and Science Fair on Thursday, January 17, at 7:00 p.m. There will be a brief program in the school auditorium, and then visitors will be free to tour the building to see student demonstrations and exhibits. The exhibition is open to the public, with a special invitation to sixth-grade students and their parents.

The 60 students in the Challege classes at Murray will attend the grand opening of the Minnesota Opera season at the Orpheum Theatre, thanks to a $700 grant from the district office. The opening concert is a recital by Leontyne Price.

Brinshall

The Early Childhood and Family Education Program staff is presenting "Color Me Wintery," Jan. 31, at Brinshall Elementary. This program will be planned with activities for all ages of young children, birth to age five.

A separate special program will be available for the infants and toddlers. The evening will include song, movement, listening, doing, fun and laughter for children and their parents.

Call 645-3240 for more information on how to register for these "Happenings."

Parkview
Parents seeking to better understand themselves and their children through education and sharing of information meet the second Tuesday of each month, at Parkview Middle School, from 1-3 p.m.

"Pushing the Limits—Beatniks, Hippies and Punks" will be the topic of the January 13 meeting. A panel discussion is Schools to 13

Holiday Greetings From Jim, Barb and Mark
We appreciate seeing you this past year and look forward to serving you in the new year.

Schools from 12 planned, with Dr. Joann Johnson, pediatrician; Liz McNamara, nutritionist; Lyle Peterson, MSW, social worker; and Dr. George Ahram, psychologist, serving on the panel. "Assertive vs. Aggressive Behavior" will be the topic of the February 12 meeting, featuring Carol and Ron Killmer of Family Plan, as the speakers. The group meets Tuesday afternoons at Parkview, in room 129, and refreshments are served. There is no pre-registration required. There is no charge for these community presentations. Video tapes are available from Parkview. Call Bruce Hashimoto, at 653-8150, ext. 425, for more information. Other tapes are also available on several topics. Call Claudia Heuer at 488-8842 for more information.

Ramsey
The Career Center at Alexander Ramsey High School now has a new computerized career guidance system called "Discover." In place of this system, a new program is being developed by the American College. Testing program to aid students in planning their futures. Included in "Discover" are four main sections including: Part I gives the student an opportunity to take any or all of three surveys which examine the individual's interests, skills and work-related values. The computer records the person's score and interprets the results. Part II provides lists of occupations that relate to these interests, skills and or work-related values. Also one can enter desired work characteristics and fields of study to get a list of corresponding occupations. Part III enables the user to conduct an indepth exploration of occupations which look promising to him/her. Part IV contains search strategies and information on educational and training opportunities in two-year colleges, four-year colleges and graduate schools. Students are invited to sign up in their Career Centers to reserve a half hour or an hour block of time to use "Discover" on the Center's new IBM computers.

In general
Classes will begin on January 7 for the Roseville Area School District Winter Youth Enrichment Program for students in grades K-5. Information pertaining to the Community Education after-school classes, tours and special events is contained in the Winter Youth Enrichment Brochure.
Most classes require pre-registration. Registration may be turned in at any of the five elementary schools, Fairview Community School Center, or may be mailed to the attention of Jane Erhardt at Fairview Community School Center, 1910 West County Road B, Roseville, MN 55113. Call 653-8150, ext. 515 for more information.

English dances
An English Country Dance will be held Jan. 5 at 8 p.m. at the Oddfellows Hall at the corner of Hampshire and Hampden Avenues in St. Paul. Coleraine Country Dance Band will provide the music and Jim Brickwedde will call the dances. Beginners are certainly welcomed as the dances are all taught. Admission is $3.75 at the door.
The English Country Dance is the grandparent of New England Contra and American Square dancing. The dances being taught at the Oddfellows Hall span the chronological period of 1650 to the present. Jim Brickwedde and Coleraine Band started doing dances together five years ago, and just recently moved the program to St. Paul to join the growing number of folk dance groups using the Oddfellows Hall.
For further information, please call (721) 8750.

Community Education
Registration for the Winter Session of Community Education classes begins on January 2 and continues through January 11 except for the weekend. The Community Education brochure that will be distributed through the mail the last week in December contains a complete listing of all classes and programs offered for the Winter Session. The Swimming Pool Activities and the Aerobics/Exercise Classes begin the week of January 14. For additional information, call the Community Education office in St. Anthony Park Elementary at 645-2456.

Parks from 1
The community center will provide programmed recreation for all ages from preschool through seniors. It will have a full-time director, two or three half-time leaders and a groundsman, and will be open morning, afternoon and evening around with weekend hours as needed. It will serve the entire service area. The neighborhood center will focus programming and athletics on youth from preschool through high school. Staff will include a full-time director, a half-time leader, an aide and a half-time groundsman. During the school year, the center will be open afternoons and evenings with morning hours added in the summer. The neighborhood center is expected to draw from a smaller geographic area than the community center.
The two seasonal recreation centers within this area will only be staffed for specific programs and activities. The programming will be provided for pre-school through 6th grade, according to a recreation service level proposal. The seasonal centers will be open for nine weeks in the winter, 40 hours in the spring, and 10 weeks in the summer. The staff will be a part-time recreation leader.
"The next step in the planning process is that representatives from the district councils and from the different recreation centers involved have to get together and decide who gets what," said Copeland.
At the District 12 meeting on December 12, Tom Baker was appointed to represent Langford Park South St. Anthony Recreation Center still has to designate a representative. Together, these delegates will meet with representatives from Merriam and Demoyer Parks to determine the final levels of service for the four recreation centers.
The four Area A recreation centers have received an extension beyond the initial Dec. 19 deadline for determining service levels, but plans remain in effect for implement-
